

SAY What does the text say? Direct quote, paraphrase, or summary	MEAN What does this information mean? Make an inference. Interpret and "read between the lines." • What does the author mean? • How can the information be interpreted? • What can be inferred? • What point is the author making?	MATTER Why does it matter? So what? What are the implications and/or possible outcomes? • Why does this information matter? • Why is this important or significant? • What are the implications or consequences of the information? • How does this connect to other ideas?
Example: <i>"Science is a way of thinking much more than it is a body of knowledge." - Carl Sagan</i>	Example: This quote implies science isn't just about memorizing facts and information. Science is a way of thinking and processing information to discover new ideas.	Example: This quote connects our misconception of "not being good at science." If you can think critically and work to discover new information in a variety of ways, you can be good at science.
"Somewhere, something incredible is waiting to be known" - Carl Sagan	This quote means there is always new information to be discovered.	Knowing this will help people keep trying to learn new things or discover new ideas.
