

SAY What does the picture say? <i>Just the facts — no opinions or guessing.</i> • What materials does the plant take in during photosynthesis? • What energy source is shown in the picture? • What two products does the plant make? • Write one sentence describing what is happening in the diagram.	MEAN <i>Read between the lines.</i> • Why does the plant need sunlight to make its own food? • What does this tell us about how plants get energy compared to animals? • What can we infer happens to the glucose after it is made? • What is the author/diagram trying to explain about plants?	MATTER Why is photosynthesis important for animals and humans? • What would happen if plants could not perform photosynthesis? • How does photosynthesis connect to agriculture or food production? • Why should farmers care about how well plants photosynthesize?
